EDUCATION

University of Information Technology (UIT - VNUHCM)

Sep 2022 - Nov 2025

Bachelor of Computer Science

GPA: 3.3/4.0

Le Khiet High School for the Gifted

Sep 2019 - Jun 2022

Information Technology Major

GPA: 3.4/4.0

SKILLS

Languages: Proficient in Python, C/C++; Basic in SQL, JavaScript, ReactJS, HTML, CSS

Deployment: Git, GitHub Actions, AWS, Docker, FastAPI, Flask, Weights & Biases, Pydantic

AI/ML: PyTorch, TensorFlow, Pandas, Spark, Scikit-learn, XGBoost, NumPy, Chroma, FAISS

NLP/CV: Hugging Face/Transformers, PEFT, SentencePiece, LangChain, smolagents, OpenCV, YOLO, Detectron2

Courseworks: Linear Algebra, Discrete Math, Calculus, Statistics and Probability, Data structure and Algorithm, Design and Analysis of Algorithms

PROJECTS

Multimodal-multilingual RAG chatbot with memory 🔗

May 2025 - July 2025

- Built a RAG system for scientific PDF files that enables multimodal processing on text, tables, and images.
- Designed a multilingual, multimodal retrieval pipeline using BGE-M3 embeddings and Chroma.
- Conducted prompt engineering with multi-turn prompts and scenario-based testing using the Gemini Model API.
- Implemented conversational memory with LangChain's ConversationSummaryMemory for context-aware follow-ups.
- Added citation-aware abstractive QA with text-level source references.
- Developed an arXiv paper search module for dynamic retrieval of 150,000+ publications.
- Containerized and deployed a FastAPI app to AWS EC2 and Hugging Face Spaces.

Vietnamese Legal Document Semantic Retrieval System 🔗

Mar 2025 - Apr 2025

- Fine-tuned a multilingual SBERT model on a Vietnamese legal corpus for better domain retrieval.
- Achieved NDCG@10: 60.4% and MAP@10: 53.6% on MTEB (BKAI Legal Retrieval dataset).
- Built an end-to-end pipeline: preprocessing → contrastive fine-tuning → MTEB evaluation → deployment.
- Implemented a GPU-accelerated FAISS index (100K docs) for sub-second ANN search.
- Deployed a Gradio interface; packaged with Docker for reproducibility.

Glassdoor 2024 Data Science Job Salary Prediction 🔗

Dec 2024 - Jan 2025

- Built a salary prediction system on 2024 Glassdoor DS job listings.
- Performed EDA, preprocessing, encoding, imputation, and interaction features.
- Reached $R^2 = 0.815$ with XGBoost (vs. 0.7 with Linear Regression).
- Tuned with GridSearchCV for best hyperparameters.
- Shipped a Streamlit app for user-driven predictions.

Glassdoor 2024 Data Science Job Salary Prediction 🔗

Dec 2024 - Jan 2025

- Built a salary prediction system on 2024 Glassdoor DS job listings.
- Performed EDA, preprocessing, encoding, imputation, and interaction features.
- Reached $R^2 = 0.815$ with XGBoost (vs. 0.7 with Linear Regression).
- Tuned with GridSearchCV for best hyperparameters.
- Shipped a Streamlit app for user-driven predictions.
